

## Levels of Care

It is our goal to surpass our patient's expectations regarding every aspect of care. In doing so, we recognize that not all patients have the same dental needs or desires. Therefore, we ask our patients to identify how they would like to be seen in our office by checking which of the three levels seems appropriate to you at this time. Please understand that it is not uncommon for patients to choose a different path after they have experienced our office. However, this will provide us with a starting point to best address your needs.

- Level 1: Reactive Care, patients at this level are generally only interested in solving more urgent problems and not in a comprehensive exam or long term planning. In addition they typically want the treatment performed to be as inexpensive and efficient as possible.
- Level 2: Proactive Care, patients who choose this level of care generally want a thorough examination and want to be involved in the prevention of present and future dental problems. Typically, a proactive patient would like to limit their treatment based on insurance benefits and minimize their out-of-pocket expense.
- Level 3: Regenerative Care, patients at this level have a high value for their dental health and appearance. They desire a complete dental examination and have a desire to be informed of all findings and the potential consequences of each problem. Ultimately, they want to be involved in creating a long term master plan for their dental health which includes choosing the longest lasting solutions to their problems.

We hope these different levels make sense to you, and as we stated before, it is not uncommon for patients to change levels after beginning treatment with us. We look forward to seeing you and helping you achieve the level of dental care most appropriate for you.
